Project Objective

- This project considers the **Digital University** of the University of Trento as the environment in which data about theses, publications and staff should be integrated by building a **Knowledge Graph (KG)**.
- Such kind of data can encode the information about *students, theses, supervisors, degrees, publications, conferences, journals, staff, positions* and other related information supporting the digital university.
- The aim of the project is to create a KG which can provide information about the theses, publications and staff of UniTn. This objective will be achieved through the **iTelos methodology** which facilitates creation of a Digital University Knowledge Graph (KG) integrating data from different data sources.

4 Schema Resources

Purpose

The final KG can be used to provide a general purpose service helping the users (for example, potential students, researchers and/or employers) to find information about, for instance, the academic and research lines pursued at UniTn. This purpose can be described in form of a user request as follows:

"A service which help the users to query and know about the different areas of academic and research interest being pursued at the University of Trento."

4 Schema Resources

Data Resources

The potential data resources provided to achieve the project's objective are:

- **Open Data Trentino :**
<https://dati.trentino.it/group/cultura>
- **Thesis @ UniTn :**
[UniTn Theses](#)
- **Publications @ UniTn :**
[UniTn Pubs](#)
- **Staff @ UniTn :**
[UniTn Staff](#)

- 3 Data Resources
- 4 Schema Resources**

Schema Resources

The potential schema resources provided to achieve the project's objective are:

- **VIVO (for modelling academics and research) :**
[VIVO](#)
- **AIISO (for modelling academic institution) :**
[AIISO](#)
- **FOAF (for modelling persons and their relations) :**
[FOAF](#)
- **schema.org (for modelling common concepts) :**
[schema.org](#)
- **DCAT2 (for modelling metadata) :**
[DCAT 2](#)
