Project Objective

- This project considers the **Trentino** region as the environment in which data about **various tourist points of interest (POI)** should be integrated by building a **Knowledge Graph (KG)**.
- Such kind of data can encode information about *shops, places of worship, monuments, panorama, public transportation services* and other information supporting tourism in the region.
- The aim of the project is to create a KG which can provide information about the Trentino's tourist related points of interest. This objective will be achieved through the **iTelos methodology** which facilitates creation of a tourist POI Knowledge Graph (KG) integrating data from different data sources.

4 Schema Resources

Purpose

The final KG can be used to provide a general purpose service helping the users (for example tourists) to find information about the various tourism related points of interest in the region of Trentino. This purpose, for instance, can be described in the form of the following user request:

"A service which help the users to know about different tourist points of interest in Trentino."

4 Schema Resources

Data Resources

The data resources provided to achieve the project's objective are:

- **Points of Interest - Various Municipalities @ Trentino :**
POIs - Various Municipalities of Trentino

- 2 Purpose
- 3 Data Resources
- 4 Schema Resources**

Schema Resources

The reference schemas provided to achieve the project's objective are:

- **GTFS Static (for modelling transportation) :**
[GTFS Static](#)
- **iCal (for modelling time) :**
[iCal](#)
- **INSPIRE (for modelling space) :**
[INSPIRE](#)
- **schema.org (for modelling common concepts) :**
[schema.org](#)
- **DCAT2 (for modelling metadata) :**
[DCAT 2](#)
