

Language Definition Tool Instructions

Access the tool through this link: <https://xlcpu.disi.unitn.it:30586/>

You can access this tool only if you are connected using the UniTn network (use VPN if you are outside the university).

Set the IDs range for your project as indicated by the following table.

Project assigned	Concept range (LD phase)
1 - Trentino Territory & Transportation	10000-11000
11 - DISI Student Lives & Points of interest in Trentino	11001-12000
7 - Weather and climate change in Trentino	12001-13000
10 - Sports Facilities & Transportation in Trentino	13001-14000
2 - Trentino Territory & Tourism Facilities	14001-15000
6 - Trentino Territory & Education Facilities	15001-16000
5 - Trentino Transportation & Education Facilities	16001-17000
3 - Trentino Territory & Health Facilities	17001-18000

Be sure that every time you are using the tool (if you need to stop the work and restart it in a future moment) the range and the current available ID are properly set.

Now you can start to search and define formally the concepts of your project (domain), thus creating your domain language!
